

CONNECT welcomes new member Agilent

Agilent is the world's leading measurement company. It works in close collaboration with engineers, scientists, and researchers around the globe to meet communications, electronics, life sciences, and chemical analysis challenges. From home entertainment to homeland security, from food safety to network reliability, and from communicating wirelessly to discovering the genetic basis of disease, Agilent provides measurement capabilities that improve safety and quality of life.

The company operates two primary businesses -- electronic and bio-analytical measurement -- supported by Agilent Laboratories, its central research group. Agilent helps:

- Test more than half of the world's 1.3 billion cell phones
- Equip more than 200 communications service providers
- Analyze the causes and cures for disease
- Advance next-generation integrated voice, video and data
- Enable the military to be more flexible, mobile and reliable
- Make the world more safe and secure from crime and drugs
- Aid the discovery and quality of medicines
- Keep our air, water, soil and food clean and safe

Agilent operates worldwide with headquarters in Santa Clara, California and offices here in La Jolla.
