

FOR IMMEDIATE RELEASE

**CONNECT ANNOUNCES FINALISTS FOR
2011 MOST INNOVATIVE NEW PRODUCT “MIP” AWARDS**

SAN DIEGO - September 27, 2011 - CONNECT, one of the most successful regional programs linking inventors and entrepreneurs with the resources they need for the commercialization of innovative products, today announced the finalists for the 24th annual Most Innovative New Product “MIP” Awards competition.

The CONNECT MIP Awards, San Diego's premier event recognizing innovation in our region, showcases locally-developed, cutting-edge products in eight categories, spanning a wide range of industries. From life-saving medical technologies to the latest action sport creation, the MIP Awards continue to be a leading indicator of the industries and technologies that drive San Diego's innovation economy.

“This year we received a record number of new product nominations, a 35% increase over the past three years. This is a significant indication that San Diego is thriving as an innovation center,” said Duane Roth, chief executive officer at CONNECT. “This year’s finalists represent some of the strongest new products produced locally over the past eighteen months. These companies deserve to be recognized for their entrepreneurial spirit and the contributions their products are making to our city’s economy.”

This year’s 24 finalists were selected from over 140 nominations, and then evaluated by 150 of San Diego’s leading industry experts and business executives in a rigorous, multi-step screening process. The finalists will have the opportunity to display their innovative products at the CONNECT MIP awards luncheon to be held December 9th at the Hilton La Jolla Torrey Pines. There, the eight winners will be announced before an audience of more than 800 of the region’s top business leaders, researchers and capital providers.
